

TERMS OF REFERENCE (TOR)
on
**The Implementation Activities for Training Group II and III Companies under
NIGERIA HCFC PHASE-OUT MANAGEMENT PLAN STAGE III 190173**

1. ORGANIZATIONAL BACKGROUND

The United Nations Industrial Development Organization (UNIDO) is the specialized agency of the United Nations that promotes industrial development for poverty reduction, inclusive globalization and environmental sustainability. The mission of UNIDO, as described in the Lima Declaration adopted at the fifteenth session of the UNIDO General Conference in 2013 as well as the Abu Dhabi Declaration adopted at the eighteenth session of UNIDO General Conference in 2019, is to promote and accelerate inclusive and sustainable industrial development (ISID) in Member States. The relevance of ISID as an integrated approach to all three pillars of sustainable development is recognized by the 2030 Agenda for Sustainable Development and the related Sustainable Development Goals (SDGs), which will frame United Nations and country efforts towards sustainable development. UNIDO's mandate is fully recognized in SDG-9, which calls to "Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation". The relevance of ISID, however, applies in greater or lesser extent to all SDGs. Accordingly, the Organization's programmatic focus is structured in four strategic priorities: Creating shared prosperity; Advancing economic competitiveness; Safeguarding the environment; and Strengthening knowledge and institutions.

Each of these programmatic fields of activity contains a number of individual programmes, which are implemented in a holistic manner to achieve effective outcomes and impacts through UNIDO's four enabling functions: (i) technical cooperation; (ii) analytical and research functions and policy advisory services; (iii) normative functions and standards and quality-related activities; and (iv) convening and partnerships for knowledge transfer, networking and industrial cooperation. Such core functions are carried out in Departments/Offices in its Headquarters, Regional Offices and Hubs and Country Offices.

The present task is within Montreal Protocol Unit (TCS/MPD) and the incumbent reports to the project manager in the unit. The MPD is responsible for planning, developing and implementing activities in Member States to facilitate compliance with the Montreal Protocol and, in particular, its Kigali Amendment and to support countries to achieve their determined contributions to reduce emissions of greenhouse gases under the Paris Agreement. Making use of the capacity building and policy support, the services of the Unit foster transformation in manufacturing concerning technologies used in the refrigeration, air conditioning and insulation with the effect of a reduction and change in working fluids and chemicals and ultimately a reduction of total greenhouse gas emissions.

PROJECT CONTEXT

The HPMP for Nigeria, approved at the 62nd meeting of the Executive Committee, will result in the complete phase-out of HCFCs in Nigeria by 1st January 2040 in line with the obligation taken by the

Government of Nigeria under the Montreal Protocol on Substances that Deplete the Ozone Layer. This is based on the combination of interrelated institutional and regulatory measures and investment activities including conversion of production facilities and strengthening of national capacities for local manufacture of hydrocarbon-based alternative refrigerants. UNDP is the lead agency for the implementation of this plan, UNIDO being the cooperating agency. Nigeria obtained financial support from the Multilateral Fund for the first stage, which resulted in the country attaining its 10% phase-out target of the baseline level by 2015. Nigeria also obtained at the 81st Executive Committee Meeting in June 2018 approval for its Second Stage of the HPMP, for a phase-out of 51.35% by 2023. For Stage II, UNDP was the coordinating agency, and both UNIDO and the Government of Italy are cooperating agencies.

After the ExCom Decision 81/40(c) noted that “approval of stage II of the HPMP did not preclude Nigeria from submitting, the 91st ExCom approved the HPMP Stage III.

Phase-out of HCFC-22 in the commercial refrigeration manufacturing sector

In the Nigeria market, there are already equipment using HC refrigerants on sale. The market and customers have gradually accepted such equipment and have certain application foundation and experience.

For the refrigerator, freezer, ice maker and RAC sector, the charging amounts of these refrigeration equipment are relatively small, and the overall design does not need after-sales installation (except RAC), so the risk of leakage is low. As an environmentally friendly high-performance refrigerant, HC can be used in small charges. At the same time, the compressor and other main parts are sufficiently supplied with many varieties, which can be applied to different refrigeration systems. The survey conducted in 2019 renewed the country's portfolio of small and medium manufacturing companies in the field of commercial refrigeration. For eligible companies, the total HCFC-22 consumption in this sector is 232.29 MT (12.78 ODP tonnes) in 2019. Among them, 1 company consume more than 6 MT, 13 companies in the range of 3 to 6 MT, 53 companies less than 3 MT, and 115 companies less than 1MT.

UNIDO's survey of HCFC consumption in the RAC manufacturing sector conducted in 2019 showed that out of 259 companies surveyed, only 183 companies in the commercial refrigeration manufacturing sector and 2 companies in air-conditioning manufacturing sector were found eligible to receive MLF support to phase out HCFC-22. Of the 185 eligible companies, only two produce air conditioning equipment, while other companies produce ice block making machines for walk-in refrigerators/freezers or install the walk-in refrigerators/freezers.

With the MLF Secretariat's encouragement during its recent review of energy efficiency projects, it is convincing that R290 (not R32) technologies should be fully promoted in the commercial refrigeration sector. This choice has been supported by the fact that Sanden Intercool in Nigeria has fully converted its manufacturing line to R290. In April 2024, a training on the safe handling of R290 was conducted for 13 companies of group I in Lagos and Ibadan respectively. The R290 training mainly targeted commercial refrigeration manufacturers and assemblers. They were engaged in assembling, installing, and maintaining various types of refrigeration and air-conditioning equipment including cold rooms, ice making machines, central and residential AC, etc.

Kigali Implementation Plan (KIP) in Nigeria

Nigeria ratified the Kigali Amendment in 2018. The enabling activities funded by the Multilateral Fund with support from UNEP, assisted Nigeria in creating awareness of HFC phase-down, and supported the amendment of the *National Environmental (Ozone Layer Protection) regulations*. However, it was only in 2022, after the adoption of the amendment of the ODS regulation, that Nigeria started the

implementation of the licensing system for HFCs. Quota allocations will be implemented fully in 2025 with the implementation of the KIP.

HCFC consumption of Nigeria in 2023 reached 1,844MT. Implementing agencies including UNDP and UNIDO are supporting Nigeria on the implementation of stage II and Stage III HPMP in parallel, Stage IV of the HPMP will be developed to completely phase out HCFCs by 2030. It is expected that HPMP and KIP could be designed and implemented in a complementary manner to strengthen the infrastructure and capacity of the country for a sustainable HCFC phase-out and HFC phasing down for Nigeria.

Table 3.1: Summary of Eligible Companies by HCFC-22 Consumption in the commercial refrigeration sector

Enterprise Category	HCFC-22 Consumption (MT)	Number of Companies	Total HCFC-22 Consumption	
			(MT)	(ODP tonnes)
Individual conversion	HCFC-22 > 6 MT	1	10.07	0.55
Group conversion 1	3 < HCFC-22 ≤ 6 MT	13	57.2	3.15
Group conversion 2	1 < HCFC-22 ≤ 3 MT	53	120.5	6.63
Group Conversion 3	HCFC-22<1MT	115	44.52	2.45
Total		182	232.29	12.78

In order to promote and accelerate the phase-down of HCFC and shift towards low GWP alternatives, the eligible companies are divided into three groups in designing the technical assistance in Stage III:

- i) **Individual Conversion:** Solutions for the enterprises will be highly customized and HC will be selected wherever possible. Efforts would be made to understand each company's situation and capacity, and tailor-made solutions would be proposed and implemented;
- ii) **Group Conversion 1:** The enterprises could choose from ready-made equipment components needed for handling HC-290 within the project budget. The companies could choose to incorporate additional solutions with additional payments; and
- iii) **Group Conversion 2:** The enterprises would be provided with technical assistance and training.
- iv) **Group Conversion 3:** The enterprises would be provided with technical assistance and training.

See list of Group II enterprises to be trained below:

S/n	Company	Location	Geo-political zone
1	Perabeam Limited	Lagos State	South West
2	Baosam Concepts	Ibadan	South West
3	A O A Technical Company	Oyo/Ibadan	South West
4	Chris Sunny Refrigeration	Kwara/Ilorin	South West
5	Edencool Technical Works	Oyo/Ibadan	South West

6	Ade Tech	Oyo/Iseyin	South West
7	Awosco Cooling Works	Oyo/Ibadan	South West
8	Adekola Adewale Tech Engineering	Oyo/Ibadan	South West
9	Odunyemi Commercial Enterprises	Oyo/Ogbomoso	South West
10	Folab Technical Works	Oyo/Ibadan	South West
11	Souna Ventures	Kogi/Lokoja	North Central
12	ABIODUN TECHNICAL SERVICE	OGUN STATE	South West
13	Das Bam and Company Ltd	Lagos/Lagos	South west
14	MICHAEL FAST COOL NIG.	BENIN	South South
15	Gab Technical Works	Kano/Kano	North West
16	OBI ELECTRICAL ENGINEERING	ONITSHA	South East
17	CHARLES ORANEBO INVESTMEENT NIG.	OBOSI/Anambra	South East
18	VIC - MON TECHNICAL	Abuja/Abuja	North Central
19	FELIX COOLING TECHNICAL	BENIN	South South
20	Amusat Oladoke Enterprises	Oyo/Saki	South West
21	Mazadu Technical Enterprises	Kano/Kano	North West
22	S. ABBEY NIGERIA COMPANY ENT.	ABEOKUTA	South West
23	Supreme Refrigeration Works	Kwara/ Ilorin	South West
24	Femtek Nig Enterprises	Oyo/Iseyin	South West
25	TAJUDEEN ALIMI CASH AND CARRY TECHNICAL SERVICES	Kano/Kano	North West
26	Aliiko Refrigeration Services	Kwara/Ilorin	North Central
27	A K Faithful Technical Industries	Oyo/Ibadan	South West
28	Easy Solution Technical Works	Kwara/Ilorin	North Central
29	JOE TECHNICAL & COMPANY	ABUJA	North Central

30	Soltech Refrigeratiuon Works (Nigeria)	Oyo/Ibadan	South West
31	Jide Tech Co.	Kano/Kano	North West
32	PHILIP COOL TECH. COMPANY	ABUJA	North Central
33	ADVANTAGE TECHNICAL SEERVICES	Abuja	North Central
34	AKAND-ALADE ALLIU TWINS TEC	Lagos/ Lagos	South West
35	Clem Makajuola Nig Ent.	Lagos/Lagos	South west
36	Ubani Technical Services	Kano/Kano	North West
37	Evercurrent Technical Company	Kano/Kano	North West
38	DEVY TECHNICA SERVICES	ABUJA	North Central
39	Jubson Technical Company	Akure/ Ondo	South West
40	Abiodun Morakinyo Nig Enterprises	Oyo/Oyo	South West
41	Morakinyo De Cool Merchant Nig Company	Oyo/Oyo	South West
42	Mofol Cool	Oyo/Iseyin	South West
43	Fash Tech Consult	Oyo/Ibadan	South West
44	Sam Goodness Technical Enterprise	Oyo/Ibadan	South West
45	Missty Tee Tech Multiservice4s	Oyo/Ibadan	South West
46	Bencool Tech Int	Akure/Ondo	South West
47	A Honesty Tech/General Ent.	Kano/Kano	North West

20	DANY BEST TECHNICAL VENTURE	ABUJA	North Central	ICE MAKING MACHINE
21	JOF-TECH TECHNICAL COMPANY	Abuja	North Central	ICE MAKING MACHINE
22	JOHN OSIKE FABRICATION WORK	Abuja	North Central	ICE MAKING MACHINE
23	DE-RAY AND CO TECH	Abuja	North Central	ICE MAKING MACHINE
24	ALIU COOLS TECH. CO	Abuja	North Central	ICE MAKING MACHINE
25	ELECTRO-DATERO NIGERIA LIMITED	Abuja	North central	ICE MAKING MACHINE
26	OLALEYE TECHNICAL LTD	Abuja	North Central	ICE MAKING MACHINE/ COLD ROOM/PURE WATER
27	SHONCOOL REFRIGERATINO AIR COND. ENTERPRISES	Abuja	North Central	ICE MAKING MACHINE /COLD ROOM/FRIDGE/ AIR CONDDITIONER
28	COOLCITY FRIDGE TECHNICAL COMPANY	Abuja	North central	ICE MAKING MACHINE/ OVEN/ LOCAL BAKERY
29	USARIK ENG. NIG LTD	Abuja	North Central	ICE MAKING MACHINE
30	AZEMOH & AZEMOH TECH SERVICE	Abuja	North Central	ICE MAKING MACHINE
31	ALBARKA WAVES CONCEPT LTD	ABUJA	North central	ICE MAKING MACHINE/ COLD ROOM
32	EZETHEC TECHNICAL SERVICES	Abuja	North Central	ICE MAKING MACHINE
33	Dens and Sons Nig Ent	Kogi/Lokoja	North Central	ICE MAKING MACHINE
34	FRIJIM ELECTRICAL ELECTRONIC	ABUJA	North central	ICE MAKING MACHINE /COLD ROOM
35	EMMANCO ANHERI ENT.	Abuja	North Central	ICE MAKING MACHINE
36	CHAN - THE COOL ENT.	Abuja	North Central	ICE MAKING MACHINE/ COLD ROOM
37	CHUKS COOL TECH. COMPANY	Abuja	North Central	ICE MAKING MACHINE

38	KAYBETH TECHNICAL	ABUJA	North Central	ICE MAKING MACHINE
39	DOECCOOL TECHNICAL	Abuja	North Central	ICE MAKING MACHINE
40	ISIAKU MUSA ELECTRICAL WORK	Abuja	North central	ICE MAKING MACHINE
41	FANEX SYSTEM NIG.	ABUJA	North central	ICE MAKING MACHINE
42	SOLOTECH ELECT. NIG. ENT. A/C & REF.	ABUJA	North central	ICE MAKING MACHINE
43	Ibrahim Muazu Tech Works	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
44	United Tech Enterprises (Babington Technical Enterprises)	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
45	Patrick Abu Technical Company	Kano/Kano	North West	ICE MAKING MACHINE
46	N U Engineering Tech	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
47	Rivers Electrical & Mechanical Company	Kano/Kano	North West	ICE MAKING MACHINE
48	Hamadex Technical Services	Kano/Kano	North West	ICE MAKING MACHINE
49	Suleiman Technical Company	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
50	OC Technical Company	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
51	BESTMAN TECHNICAL WORKS	Abuja	North West	ICE MAKING MACHINE
52	Taoteco Technical Works	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
53	Aray Home Air Conditioning Clinic	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM
54	God With Us Feel Engineered Works	Kaduna/Kaduna	North West	ICE MAKING MACHINE
55	Tunde Technical Services	Kano/Kano	North West	ICE MAKING MACHINE
56	Tadlok enterprises	Kano/Kano	North west	ICE MAKING MACHINE/ COLD ROOM
57	Champion Technical Company	Kano/Kano	North West	ICE MAKING MACHINE/ COLD ROOM

58	Taiye Technical Works	Kano/Kano	North west	ICE MAKING MACHINE/COLD ROOM
59	Abbey Technical Company	Kano/Kano	North West	ICE MAKING MACHINE/COLD ROOM
60	Tajudeen Abdulsalam Tech Works	Kano/Kano	North West	ICE MAKING MACHINE/COLD ROOM
61	Sam Technical Refridgelant	Kano/Kano	North West	ICE MAKING MACHINE/COLD ROOM
62	Amark Technical Company	Kano/Kano	North West	ICE MAKING MACHINE/COLD ROOM
63	Tunde Technical Works	Kano/Kano	North West	ICE MAKING MACHINE/COLD ROOM
64	Achyman Global Link Services	Kaduna/Kaduna	North West	ICE MAKING MACHINE/COLD ROOM
65	ADAMS TECH. EMERGENCY	Abuja	Noth Central	ICE MAKING MACHINE
66	Olurotimi Olufowose NIG Ent	Oyo/Ibadan	South West	ICE MAKING MACHINE
67	IFECO CONSTRUCTINO CO. NIG.	Obosi/Anambra	South East	ICE MAKING MACHINE/ ICE CREAM, BOTTLE WATER, DEEP FREEZER
68	N-NDU ELECTRICAL	Aba	South East	ICE MAKING MACHINE
69	PEE COOLING TECH.	Aba	South East	ICE MAKING MACHINE/COLD ROOM
70	GODS OPINIO TECHNICAL NIG.	ONITSHA	South East	ICE MAKING MACHINE
71	E-PAL ENTERPRISES NIG LTD	Aba	South East	ICE MAKING MACHINE
72	UGOWE ENG. COMPANY	Benin	South South	ICE MAKING MACHINE/COLD ROOM/ BUILDING OF MINI COLD
73	GEOWHO ENINGEERING INTERNATIONAL COMPANY	Portharcourt	South South	ICE MAKING MACHINE/ CENTRAL UNIT, COLD STORE
74	CHRISTOLY NIG. ENTERPRISES	PORT HARCOURT	South south	ICE MAKING MACHINE

75	OGTECH ELBART LTD	PORT HARCOURT	South South	ICE MAKING MACHINE/ COLD ROOM
76	A. Z. MOMOH NIGERIA LTD	Port Harcourt	South south	INDUSTRIAL COLD ROOM, MARINE COLD ROOM, BOX TRUK COLD ROOM
77	BAYOSON TECHNICAL	Lagos	South West	ICE MAKING MACHINE/ COLD ROOM
78	OHAVIC VENTURES	PORT HARCOURT	South South	ICE MAKING MACHINE
79	SAROCOOL TECHNICAL SERVICES	PORT HARCOURT	South South	ICE MAKING MACHINE
80	NESCO TECHNICAL SERVICE CO.	PORT HARCOURT	South south	BOX TRUCK COLD ROOM, MARINE COLD ROOM, INDUSTRIAL COLD ROOM
81	AUSTIN LAZ & CO PLC	BENIN	South South	ICE MAKING MACHINE
82	DE HEROES REFRIGERANTINO CO.	PORT HARCOURT	south south	COLD ROOM/ INDUSTRIAL REFRIGERATION
83	ANGSONS ENTERPRISES	PORT HARCOURT	South south	ICE MAKING MACHINE/ COLD ROOM
84	COOLMAN TECH SERVICES	Akwa Ibom	South south	COLD ROOM
85	Pauli Brothers and Company	Enugu/Enugu	South East	ICE MAKING MACHINE
86	Samuel Technical Works	Oyo/Oyo	South West	ICE MAKING MACHINE
87	Jumascoi Technical Engineering Company	Oyo/Ibadan	South West	ICE MAKING MACHINE/ COLD ROOM
88	BEST JOHNNY TECHNICAL COMPANY	Abeokuta	South West	ICE MAKING MACHINE
89	AJAYI EZEKIEL	Lagos	South West	ICE MAKING MACHINE/ COLD ROOM
90	Castrol Joe Tech.	Akure/Ondo	South West	COLD ROOM
91	SIKFAT COMM. ENT.	Lagos	South West	ICE MAKING MACHINE/ COLD ROOM

92	ELECTRICAL ENG. CO.	Lagos	South West	ICE MAKING MACHINE/ COLD ROOM
93	OLALEKANCOOL SERVICES NIG.	Lagos	South West	ICE MAKING MACHINE
94	AJITECH TECHNIAL SERVICES	Lagos	South West	ICE MAKING MACHINE/ COLD ROOM
95	Oyegoke Electrical Works	Oyo/Ibadan	South West	ICE MAKING MACHINE/ CHILLERS, AIR CONDITIONERS
96	Nurudeen Adeojua Ice Block Making Machine	Oyo/Ibadan	South West	ICE MAKING MACHINE/ COLD ROOM
97	Orosun Nigeria Limited	Ogun/Ijebu Ode	South west	ICE MAKING MACHINE
98	OLU-ADE TECHNICAL SERVICES	ABEOKUTA OGUN STATE	South West	ICE MAKING MACHINE
99	Dansfocus Technical Company	Oyo/Ibadan	South West	ICE MAKING MACHINE

8	Choice International Group (CIG) Motors Co. Ltd	Abuja	North Central	GAC Motors, JMC Motors and Wuling Motors
9	JAC Motors Ltd	Lagos	South West	JAC Motors
10	Innoson Vehicle Manufacturing co. ltd	Anambara	South East	Innoson Motors

2. Purpose of the Term of Reference

The primary objective of the terms of reference is to guide on the training activities for the Nigerian commercial refrigeration enterprises on their conversion to R290 under the HPMP Stage III project. This contract is for the logistical organization of training for 53 companies of Group II, as well as for 115 companies of Group III and for 10 companies of KIP, which will be conducted in the government identified centers of excellence across the country.

The planning of the logistical organization of training sessions must be done in close coordination with the National Ozone Office (NOO) of Nigeria and two trainers, who will share the training materials and any other additional considerations.

After completion of these training sessions, a separate final training (one day) must be held. This session will host Group I, Group II, Group III and 15 KIP companies (**in total 196 companies/ trainees**) again and will summarize the most important lessons learned, as well as a demonstration of usage of a logbook.

Training Modules and Topics

Participants' training module will be mostly focused on the areas mentioned below:

- Thermodynamics and refrigeration cycles
- H-P chart
- Types and physio-chemical properties of refrigerants HCFC, HFCs, HFOs, HC, CO₂, NH₃ and blends and safe handling of the flammable and toxic refrigerants and lubricants
- Type of commercial refrigeration and AC systems
- Electrical wiring basics and safety
- Vacuum and vacuum pumps including anti-explosion (ATEX) pumps
- Choice of appliances and systems
- Installation, servicing, maintenance, repair or decommissioning of the equipment
- Leak checks of the equipment
- Minimizing leaks
- Refrigerant identification
- Safe handling of cylinders (disposable and recovery cylinders)
- Contamination test kits
- Storage of used refrigerants
- Hermetic seals (blazing v.s. lockring, etc.)
- Good servicing practices
- Environmental impacts
- Energy efficiency of different refrigerants
- HCFC Phase-out Management Plan and Kigali Implementation Plan
- Key manufacturing process (pre-foaming, foaming, post-foaming, vacuuming, charging, leak check, electrical testing, etc.)
- Effective data and record keeping

The last day of trainings must be dedicated to the maintenance and proper cleaning of the devices and equipment. This means demonstrating to the trainees how to take care of the equipment in order to ensure a safe, sustainable and long usage of the equipment.

3. Scope of work

Under the direct supervision of the UNIDO Project Manager and in close coordination with the National Ozone Office, the contractor shall implement the following tasks:

a. Secure identified training centres for the duration of training programme and support the successful execution of the training exercises

Under this task, the contractor will be responsible for:

- Organizing ten three-days training sessions in three training centres in three locations: Lagos, Kano and Port Harcourt;
- Developing a sex segregated list of trainers and trainees;
- Advising and guiding the training plans and methodology, for review by UNIDO and NOO;
- Developing training agenda, in close coordination with the UNIDO trainers, and sharing with UNIDO and NOO for review;
- In close coordination with NOO and UNIDO, identify suitable dates for all the trainings;
- Liaise with the identified training centres, and ensure all materials and equipment is there before the training
- In close coordination with the UNIDO trainers, administer pre and post-test questionnaires and submit to UNIDO;
- Print training materials and manuals for the dissemination to training participants.
Developing general evaluation sheet of the training (to include venue, equipment, logistics, coordination etc), administer to trainee enterprises and submit to UNIDO;
- Submitting a detailed training report alongside a segregated list of participants and identifying areas of improvement to plan, direct, organize, and schedule for subsequent training programs.

b. Coordinate all logistic and training actions

The contractor shall perform the following:

- Identify and provide suitable accommodation for all trainees; within the UNIDO Daily Sustenance Allowance (DSA)
- Book air/bus/train tickets or transportation for participants attending from other cities to the designated training location;
- Provide intra city transportation for transfers to and from the hotel and the training centre after each day's training and for any other necessary destinations;
- Book hotels/any other suitable accommodation booking for all trainees;
- Pay the trainees Daily Sustenance Allowance (DSA) as appropriate and as agreed by UNIDO and NOO. The exact DSA amount should comply with UNIDO rules and the exact amount to be disseminated to trainees will be shared with a successful bidder.

c. Media/visibility:

In consultation with UNIDO and NOO;

- Design and print UNIDO and NOO branded training materials and banners. UNIDO will share training materials in doc and pdf formats for further printing. Two banners must be designed and printed per location: two for Kano, two for Port Harcourt and two for Lagos. Additional two banners must be designed and printed for the final workshop in Lagos, where all companies would be invited. The contractor is to print hard copies of the training materials. The material should be in A4 size, 80 gsm (thickness 0.09 mm - 0.11 mm) and either spiral or

thread bound. In total 178 trainees will attend the trainings, with a buffer in case of loss or damage, the contractor should print 200 hard copies.

- Design and bring UNIDO and NOO sets of branded souvenirs to the training center. One set of branded souvenirs should contain one jotter (A5, hardcover, paper thickness of 80 gsm (0.09mm - 0.11mm), one pen, one hat and one workshop bag. In total 178 trainees will attend the trainings, with a buffer in case of loss or damage, the contractor must bring 200 sets of branded souvenirs.
- In close coordination with NOO and UNIDO trainers, a Certificate of Participation to be shared with trainees for NOO and UNIDO's signature. The UNIDO template for Certificates will be provided by UNIDO.
- Bring 200 copies of a logbook for the final training. The logbook must have a paper density of **110 gsm (0.12 mm)**. **This logbook must also be provided in digital form to UNIDO and NOO.**
- Provide professional pictures from all training sessions through a verified and safe link and a copy in an external hard drive;
- Develop a media briefing and submit to UNIDO, not later than 3 working days after the trainings sessions in one location have been finished. A final report is expected after the final training in Lagos.
- Procure new safety boots and reflective jackets for the purpose of the training (200 safety boots and 200 reflective jackets to be disseminated for the training participants);
- Provide media coverage for the training at the designated training locations e.g. TV, radio, prints, social media etc. Each training shall be reported in at 5 different media sources;
- Develop a communications video for each of the training locations and a joint video for all the Group 2 and Group 3 trainings. Two versions shall be submitted; an abridged version of not more than 3 minutes each and an original version.

d. Others:

- Ensure that UNIDO's name and brand is protected at all times;
- Organize the provision of water and coffee during the training session;
- Ensure safe storage at each training centre, UNIDO procured equipment/materials for enterprises and in the presence of UNIDO and NOO ensure distribution and presentation of equipment to trainee enterprises

4. Location

Locations of Training

The trainings will be held for the 53 Group II enterprises and 115 Group III and 10 KIP companies at 3 designated Centres of Excellence as designed by the National Ozone Office (NOO) of Nigeria. The training will be held at Kano, Port Harcourt and Lagos.

Sr. No.	Training Center	Location (City/State)	Equipment Available	Classroom Capacity
---------	-----------------	-----------------------	---------------------	--------------------

1.	Cool Plus Limited	Plot 23, Theophilus Oji Street, off Fola Osibo Road, Lekki Phase 1, Lagos State	Recovery Machines for R-22, Recovery tank, Refrigerant recovery cylinders (30lb), Vacuum pump, Vacuum gauge, Brazing set, Pinch off tool, Electronic refrigerant scale, Normal Leak detector, service manifold, electronic gauges, electronic hoses and accessories, hoses with valves Service port coupler, set Core removal tool Piecing plier including valve Charging hose and cylinder connections Heating belt with thermostat, Thermometer, electronic Multimeter with clamp on amp measurement Tools for tubing General tube cutters Capillary tube cutter Pinch off plier Flaring tool Tube bender Tube expander Brazing equipment and tips Igniter Consumables, 1 set Safety equipment Safety Glasses Gloves Hydro Carbon Service Tools N2 flushing equipment HC Leak detector HC Charging equipment Venting hoses and accessories Refrigerant Identifier Portable recycling machine External filter kits Burn out filter accessories Test rack with instruments.	Each group will have three-day training Group II 27 trainees (1 per enterprise) Group III 42 trainees (1 per enterprise) + 10 trainees (1 per enterprise from KIP)
2.	Government Technical College	No 1 State Road, Opposite Kano Line, Kano. Kano State	Recovery Machines for R-22, Recovery tank, Refrigerant recovery cylinders (30lb), Vacuum pump, Brazing set, Pinch off tool, Electronic refrigerant scale, Normal Leak detector, service manifold, gauges and accessories, hoses with valves, Service port coupler, set Core removal tool, Piecing plier including valve, Charging hose and cylinder connections, electronic Multimeter with clamp on amp measurement, General tube cutters, Pinch off plier, Flaring tool, Tube bender, Tube expander, Brazing equipment and tips, Igniter, Consumables, 1 set, Safety equipment, Safety Glasses, Gloves Hydro Carbon Service Tools, N2 flushing equipment, HC Leak detector, HC Charging equipment, Venting hoses and accessories, Refrigerant Identifier Portable recycling machine, External filter kits, Test rack with instruments.	Three-days training session for: Group II 22 trainees (1 per enterprise) Group III 65 trainees (1 per enterprise)

3.	Government Craft Development Center	Aba Road, by Garison Junction, GRA, Port Harcourt, Rivers State	Recovery Machines for R-22, Recovery tank, Refrigerant recovery cylinders (30lb), Vacuum pump, Brazing set, Pinch off tool, Electronic refrigerant scale, Normal Leak detector, service manifold, gauges and accessories, hoses with valves, Service port coupler, set Core removal tool, Piecing plier including valve, Charging hose and cylinder connections, electronic Multimeter with clamp on amp measurement, General tube cutters, Pinch off plier, Flaring tool, Tube bender, Tube expander, Brazing equipment and tips, Igniter, Consumables, 1 set, Safety equipment, Safety Glasses, Gloves Hydro Carbon Service Tools, N2 flushing equipment, HC Leak detector, HC Charging equipment, Venting hoses and accessories, Refrigerant Identifier Portable recycling machine, External filter kits, Test rack with instruments.	Three-days training session for one group Group II 4 trainees (1 per enterprise) Group III 18 trainees (1 per enterprise)
----	-------------------------------------	---	--	---

The 53 Group 2 enterprises will be divided across the three locations according to the geographical locations and their nearness to any of the designated training centres.

8) Training

As noted in above, both Group II and Group III , as well as 10 KIP companies are to be trained. In total this amounts to 178 companies, Group II accounts for 53 enterprises, Group III accounts for 115 and KIP accounts for 10 enterprises.

The training sessions have been divided according to the least distance of the companies to the three above mentioned training centres. See below the total number of training sessions established per location.

Total number of training sessions

Training Centre	Group II (53 companies)	Group III (115 companies)	
Kano State	1	3	Each session lasts for three days
Port Harcourt	1	1	
Lagos	2	2	
Total	10 sessions		

	Session	Location	Amount of trainees
Group II	Session #1	Kano	22

	Session #2	Lagos	14
	Session #3	Lagos	13
	Session #4	Port Harcourt	4
Group III	Session #5	Kano	22
	Session #6	Kano	22
	Session #7	Kano	21
	Session #8	Port Harcourt	18
	Session #9	Lagos	22
	Session #10	Lagos	20 (10 KIP)

Final training

As mentioned above, a separate, final training (one day) with 196 companies must be held in order to recall all important information that the trainees were taught. In addition, the usage and importance of keeping a logbook must be demonstrated at this training.

	Location	Topics	Beneficiary companies	Trainees
1st half of the training	UNIDO Office in Lagos	Equipment dissemination Logbook usage	GI, GII, GIII, 15 KIP	196
2nd half of the training	UNIDO Office Lagos	Maintenance	GI, GII, GIII, 15 KIP	196

5. General Time Schedule

This contract shall be executed within a twelve-month period. Each training session will hold for three days each which will include both theory and practical exercises. There shall be one training for three days per group of maximum 22 persons per location as stated in the three location tables above. The successful bidder will work in cooperation with the NOO and UNIDO, training invitation letters shall be developed and sent to trainee enterprises not less than two weeks before the travel date of the start of the training sessions. After completion of all the above mentioned trainings, a one-day training session for Group I, Group II, Group III and KIP companies (196 enterprises) shall be held in Lagos at a future date.

6. Technical Requirements

Experience:

The contractor responsible for organizing logistics and administration must possess relevant experience organizing similar technical training workshops for refrigeration and air-conditioning technicians and to have prior experience of work (at least three years) with government and UN institutions. The contractor should have substantial experience in organizing workshops and provide three samples of previous work done. CVs of the proposed key personnel are to be provided. A list of minimum three similar project references is to be provided.

The contractor should also provide a list of equipment and material necessary for conducting the trainings (i.e. projector, flipcharts etc.) In addition to this, the contractor must provide UNIDO with intermediate reports after finishing the trainings at each location, as well as a final report after completion of the final training. Up until three days after completion of the trainings in Kano, UNIDO is to receive an intermediate report . After completion of the trainings in Port Harcourt, UNIDO shall receive an intermediate report up until three days after completion. The same counts for completion of trainings in Lagos and the final report.

Proposal content:

- Proposal shall include a preliminary time schedule with a proposal for executing the project. The total project duration should not exceed eight months from the date of award to the date of handover.
- Bidders may choose to provide financial proposal for the required services and related equipment for all three locations in Nigeria. Partial bids (for one or two locations only) would not be accepted.

7. Language Requirements

All official communications and training sessions will be done in English. All the training materials have been prepared in English. In addition, the contractor must be able to understand Pidgin English.

8. Deliverables

Schedule	Deliverables	Payments
Upon signature	<ul style="list-style-type: none">• Signed contract;• Workplan;• A list separating the enterprises by businesses into training groups 22 people maximum;• Pre- and post-evaluation questionnaires;• Draft designs for banners, flyers, jotters, pen bags and any other training materials, which were developed in cooperation with NOO of Nigeria;• Design of certificate of participation;• Training sessions agenda for Kano, Lagos, Port Harcourt and a final session in Lagos;• Invoice.	40%
Completion of the contract	<ul style="list-style-type: none">• A sex segregated list of participants• Photos links and hard drive• Copies of printed training manuals and materials	60%
